Sprint 1 & 2 Presentation

Little bit of a background

The Problems

1. A lot of readers read there favorite series in aggregator sites. Which means ...

Pop up ADS!

- Tap or scroll, too much pop up ads that makes you go to another site or it is impossible to read

2. Majority of people read via phone and

- Browsers have address bar that are distracting

There are already apps that exist in the Apps Store

Pros

- Official English Translation
- Good UI

But why do people still choose to read in aggregator sites?

- Official English Translation is slower to release new chapters
- Fan Group Translation is much more faster
- Sometimes lesser-known series doesn't get translated into English by Offical English Translation
- Fan Group Translation always pick up lesser-known series

Here are three ways to read your series

- Wait for an Official English Translation
- Learn the Language
- Fan Group Translations
